

Hypodontia MDT Clinic (missing tooth clinic)

The missing tooth clinic is an opportunity for patients and parents to discuss their concerns about their child's teeth and to explore the options available with the multidisciplinary team.

It's important you/your child is involved in the decision making process so the best treatment plan and the timing of this can be agreed on at this appointment.

You may find it helpful to ask these 3 questions:

1. What are my choices?
2. What is good and bad about each choice?
3. How do I get support and help me to make a decision that's right for me?

Sometimes there is a wait to be seen, so please bear with us.

We appreciate your patience for waiting for this clinic appointment. In order to plan your time at the hospital please be prepared to be here for an extended amount of time as currently the clinics are very busy due to demand.
